

A Success concept for the modern office!

The Gotessons table ,floor and wall screens range has now been extended with a practical design coordinated stool.

The stools were initially actually only made for our stand at the furniture fair, however, we received such a tremendous feedback and enquiries from clients, we realized that there was a genuine request for this product, says Johan Götesson, MD.

The stool is available in two models: SMS-box which stands for Sit, Meet and Store, and SM-Box - Sit and Meet. SMS box has wheels and storage space under the lid. The basic SM-box model functions as stool only.

The idea is that one can combine the stool with floor or table screen textile. The stool can then be used as visitors seat, storage space and foot rest at the workplace taking up minimum space.

Also handy as a trendy informal meeting area concept.
