Near & Far Collection

Interface®

Near & Far™ Collection

Fine craftsmanship is marked by the ability to expose the inherent beauty of the materials used; mastery of technique draws nuanced effects through colour placement, texture and finish. It is a kind of authenticity we learned from our best design-mentor, nature. Every time a designer chooses to engage nature as source and inspiration, beautiful things emerge and we find paths to reconnect our modern lives with the physical world. And that is a good thing.

Near & Far Collection can be found somewhere between made and found. The organic reference is clear, but we can see the artisan's hand in the shape and materials. NF400™ studies shade and hue in striations that run the length of our 25cm x 1m skinny plank. NF401™ explores these ideas in greater dimensions with carving and depth and curvilinear movements. The juxtaposition of the two set side by side awakens the edges, adding a third design element to explore.

The latest addition to our growing global category, Near & Far is made with 100% recycled nylon made in part from reclaimed fishing nets. And when its useful life is through, it can be reclaimed for recycling through Interface's ReEntry® program. And that is another good thing.
